OLMSTED MOORING CELL CONSTRUCTION SUSPENDED

MILES 965.7 TO 966.1, RIGHT DESCENDING BANK (RDB), OHIO RIVER

1. Reference Louisville District's Notice to Navigation Interests No. 2002-012, dated August 20, 2002, Subject: "Construction of Mooring Cells for Olmsted Locks and Dam Between Miles 965.7 to 966.1, Right Descending Bank, Ohio River."
2. Aquaterra Contracting, Inc. has been constructing the mooring cells for the Corps of Engineers to be used as a queuing area at Olmsted Lock and Dam project since June 25, 2002. This work has been suspended due to seasonal high water conditions and will resume during favorable lower river conditions later in the year.
3. We strongly request that navigators not use the mooring cells for tying off and any other usage until construction is completed.
4. Navigators should exercise caution while transiting this area of the river.
